

TISSUE CULTURE

CATALOGUE

2021-2022

Tissue Culture Dishes

"Dish for tissue culture" has excellent cell adhesion by applying a special surface treatment to the culture surface.

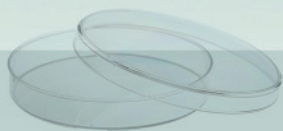

* "Non-treated dish" is suitable for culturing floating cells without surface treatment of the culture surface.

* The material is all made of transparent polystyrene, which has excellent smoothness and optical properties of the culture surface.

IWAKI

CULTURE DISH

TC - Treated

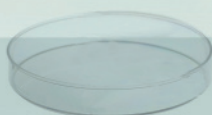

Code	Size (mm)		Packaging

IWAKI

BACTERIAL PETRI DISH

Ethylene Oxide Gas (E.O.G)
Sterilized

Code	Size (mm)		Packaging	
	OD (mm)	H (mm)	PCS/ Inner Pack	Pcs/ Case
SH90-15	90	15	10	500
SH90-20	90	20	10	500

Ideal for Bacterial Culture on Agar Medium.

* The material is polystyrene with high transparency.

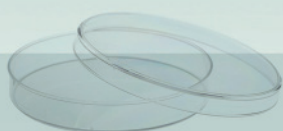

* Non-slip ribs are attached to the top of the lid to stabilize stacking.

* The shallow type has a protrusion inside the lid to prevent the bottom and lid from sticking to each other.

BACTERIAL PETRI DISH

Sterilized

Code	Size (mm)		Packaging
	OD (mm)	H (mm)	Pcs/ Case
3101011-10223	90	15	500

* The material is polystyrene

* There are 4 divisions (lines) on the bottom and it is convenient to count colonies

* It is an electron beam sterilized petri dish

MULTI WELL PLATE

* Made of premium grade polystyrene

* The lid is not special surface-treated. In case of condensation, the ring on the inner surface of the lid prevents lateral flow of condensation.

* Cross-contamination with a design that allows the lid to fit only in the same direction as the independent well

TISSUE CULTURE FLASK

Designed for optimum growth of anchorage dependent cells. Choices of double-sealed caps for air tight culture, and vented caps for culture requiring constant gas exchange. Non treated flasks for suspension culture are suitable for culturing hybridoma of lymphocytes.

* Wide opening allows easy pipetting and cell scraping.

* Exceptional optical clarity.

* All Flask are individually tested, pressure, sterility, TC-treated and non pyrogenic.

* 0.22 um hydrophobic membrane of vented cap provides stable gas exchange, thus eliminating bacterial and fungal contamination. Vented cap flasks are best suited for use in CO2 incubator.

CENTRIFUGE TUBE

* Centrifuge tubes are designed for general laboratory centrifugation use as well as for specimen collection and transportation.

* Standard 15 ml & 50ml capacities are available in either high clarity polystyrene (P.S) or opaque polypropylene (P.P) for high speed centrifugation and low protein binding.

* All tubes are gamma-irradiated for sterility, and are supplied with leak-free flat-top triple-sealed cap.

* Tube have black printed volumetric graduation with large white marking spot for ease of labelling.

* Both 15 ml and 50 ml tubes are available in rack-packed or bulk packed.

* Special designed rubber adaptor for 50 ml tubes is available for use in high speed centrifugation

* DNase, RNase, DNA Free

RUBBER ADAPTER

For Centrifuge Tube

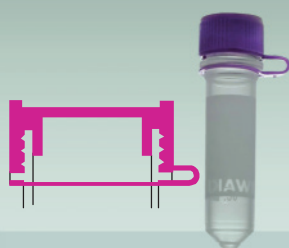

MICRO CENTRIFUGE TUBE

- * Supplied sterilized with leak-proof attached loop caps.
- * Choice of 1.5 and 2.0 ml polypropylene (P.P) tubes.
- * Tubes are available in both and conical free-standing base.
- * Maximum RCF rating: 20,00 x g(17,000 RPM).
- * These tubes are excellent for high speed centrifugation, specimen collection and transportation, or for incubation.
- * Free DNase, RNase, DNA Free
- * Can be centrifuge, Boiled and Frozen

- * Culture tubes are gamma-irradiated and supplied with 2-position push-on caps.
- * Available in 2 sizes : 12 x 75 mm (5 ml) & 17 x 100 mm (13 ml).
- * 2-position push-on offers efficient gas exchange and it can be air-tight by easily pushing the plug seal into the tube.
- * Tubes are available in individual sterile packed or sterilized bulk packed.
- * Tubes are available in opaque polypropylene (PP) round bottom base.
